· Remaining Useful Life (RUL) prediction of lithium-ion batteries

BruceTS

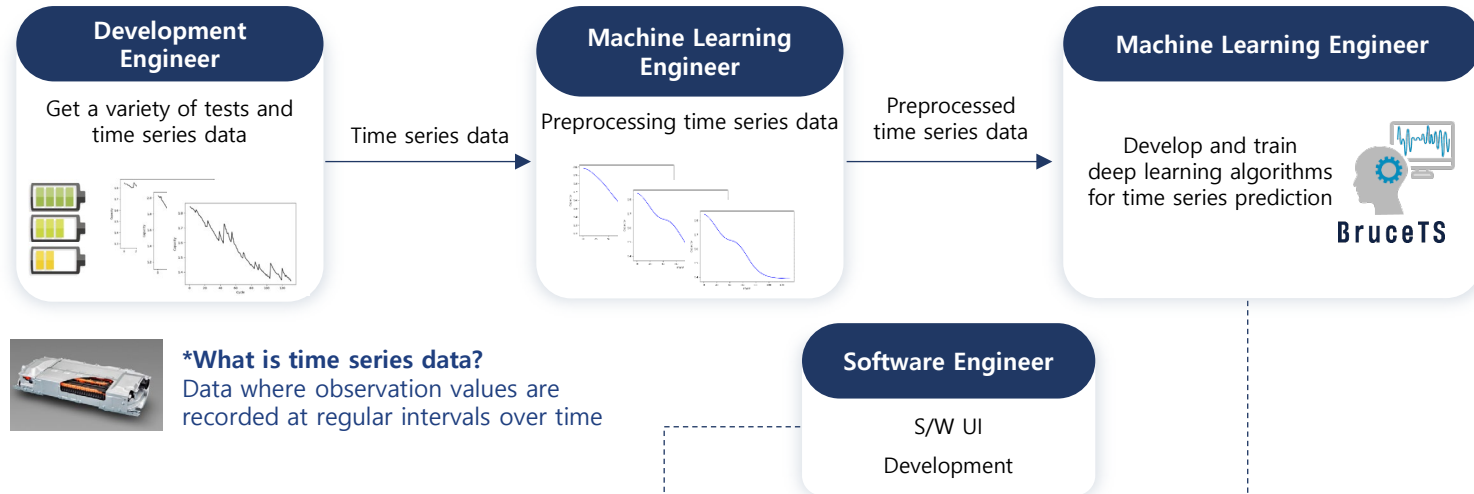

BruceTS is a technology that utilizes Deep Learning to predict time series data mainly in the engineering field.

It is a customized service that offers assistance in the form of a service that satisfies customer needs.

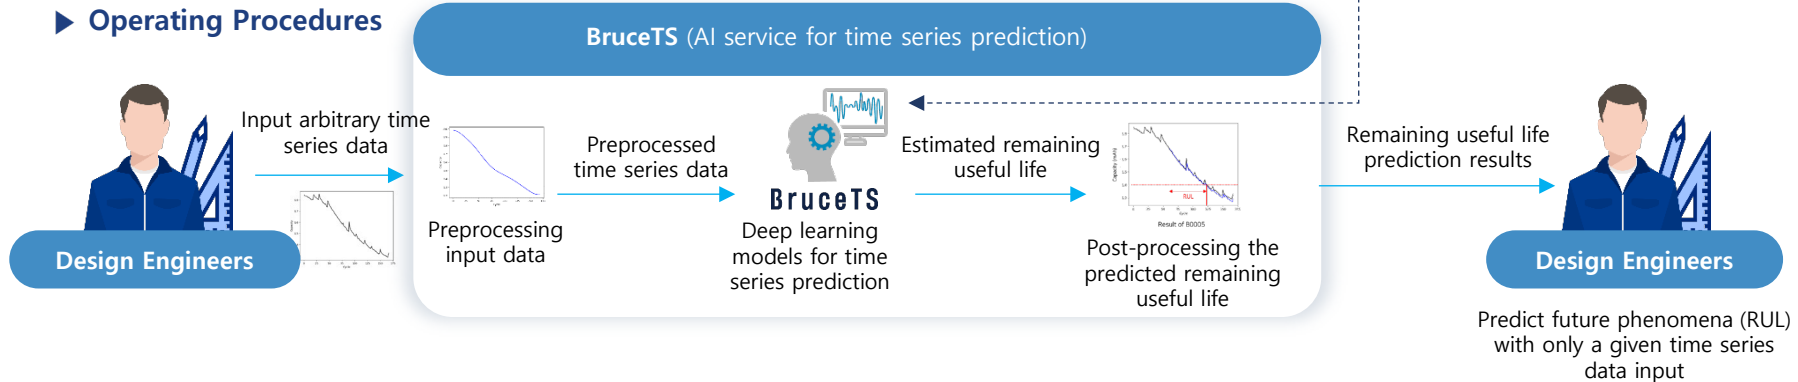

BruceTS Development Process / Operating Procedures

► Development Process

► Operating Procedures

Features of BruceTS

Preprocessing time series data

- Preprocess raw time series data so that deep learning models can learn effectively

Predicting future phenomena

- Able to predict the future system phenomenon simply using the provided time-series data, without any actual experimentation

Apply the optimal deep learning method

- Perform deep learning by applying the latest and greatest deep learning methods for time series prediction

Provide time series forecasting tools that are easy to put into practice

- Easy to implement in practical situations.
- Launch the tool, enter the design you want to predict, and get instant predictions

Expected effect of BruceTS

Improve time series prediction accuracy

Accurately and quickly make time series predictions using any patterned time series data you have

Expected effect

Increase practical applicability

Easy to implement in practical situations

Application case of BruceTS - Remaining Useful Life (RUL) prediction of lithium-ion batteries

Goals

- Predicting SOH and RUL of lithium-ion batteries with deep learning based on accumulated state of health (SOH) time series data

Input data

- Time series that have not reached their end of life (EOL) Data

Deep Learning Method

- TCN(Temporal Convolutional Networks)

What BruceTS predicts

- State of Health(SOH)
- Remaining Useful Life(RUL)

Time series data for a given lithium-ion battery

- B0005 - Capacity value from 0 to 60 cycles (mAh)
- B0006 - Capacity value from 0 to 60 cycles (mAh)
- B0018 - Capacity value from 0 to 60 cycles (mAh)

— : SOH Ground truth — : SOH Predicted value

Result of B0005

Result of B0006

Result of B0018

PIDOTECH

We will reward you with the best quality and service. thank you
